INITIAL SETUP FMR CONNECT™

I. Download the FMR Connect™ app to your smartphone. Depending on your smartphone's operating system, the app is available free of charge from Apple for iOS™ and Google for Android™.

II. Open the app and confirm the warnings and grant the required permissions for the app to access your smartphone.

III. Start the radio's Bluetooth pairing process as described under Bluetooth and USB Music Streaming – using the push button or the radio controls.

IV. Then connect the app by tapping the SELECT button and add your radio to the app. Once the connection has been successfully established, you will hear the voice prompt: "Bluetooth Smart connection established."

V. At this point, you can also set up the regular Bluetooth connection in your smartphone's settings. The radio will remain in pairing mode for 90 seconds. If this time expires, you will need to start the pairing process again.

NOTE:
Only one Bluetooth connection can be active at a time. Once you have set up both connections, the connection to the app will be established automatically whenever you open it. Therefore, once you have completed all settings in the app, make sure the app is fully closed so that the regular Bluetooth connection can be reactivated.
